## Students and Practitioners Are Saying

Certification was highly important to me. I knew that I could get through that process, having completed all five levels of HTP training. I wouldn't trade the time, money, travel, and effort it took me to become a Healing Touch Certified Practitioner (HTCP) for anything in the world. What we offer the world is immensely important.

Healing Touch changed my life. It not only gave me tools to live with serious life limiting illness and thrive, but also a venue to turn that experience around and help others facing similar challenges. This is no small accomplishment.
